

Strap thermocouple			Bolt-on thermocouple		
TKE 70 tangential			TKE 80		
Application Temperature measurement on tubes and cylinders in machines and moulds e.g. in the plastic processing. Easy mounting near the band heater. Narrow strap.			Application Temperature measurement in machines and moulds e.g. in the plastic processing. Probe rounded, suitable for all normal bores.		
General data Operation temperature: Up to 400°C Material tube, strap, cable protection: Stainless steel Type TC: Fe-CuNi(J) standard, NiCr-Ni(K), Pt100 Connection: Glassfibre/Glassfibre/Stainless steel, core cable ends			General data Operation temperature: Up to 400°C Material tube, block, cable protection: Stainless steel Type TC: Fe-CuNi(J) standard, NiCr-Ni(K), Pt100 Connection: Glassfibre/Glassfibre/Stainless steel, core cable ends		
					
Standard version On stock or with short delivery time	Description TKE 70-40 Element Fe-CuNi(J) DIN IEC 584 insulated Connection 2m, D = 25-40mm	Art.-Nr. 80070.041.120	Standard version On stock or with short delivery time	Description TKE 80 Element Fe-CuNi(J) DIN IEC 584 insulated Connection 3m	Art.-Nr. 80080.001.130
	TKE 70-60 D = 40-60mm	80070.061.120			
	TKE 70-80 D = 60-80mm	80070.081.120
