

Screw-in thermocouple			Bolt-under thermocouple		
TKE 91			TKE 74		
Application Temperature measurement in machines and moulds e.g. in the plastic processing.. Probe flat, low mass, quick response, space saving design.			Application Temperature measurement on tubes and cylinders in machines and moulds e.g. in the plastic processing. Easy mounting under the band heater. Small, space saving design, mounting from the side or in the splice gap of the band heater.		
General data Operation temperature: Up to 400°C Material probe, cable protection: Stainless steel Type TC: Fe-CuNi(J) standard, NiCr-Ni(K), Pt100 Connection: Glassfibre/Glassfibre/Stainless steel, core cable ends			General data Operation temperature: Up to 400°C		
					
Standard version On stock or with short delivery time	Description TKE 91-12x1,75 Element Fe-CuNi(J) DIN IEC 584 insulated Connection 1m	Art.-Nr. 80091.001.110
