

# Nolden Connector-Service

## Save time and money for the purchase of your connectors

For the wiring of electrical heaters in the plastic moulding industry, different types of connectors are used, mostly the so called "heavy" series.

### Your advantage:

- **Simple ordering** A clear program of preferred types saves you time – you can quickly find your needed connector.
- **Quick delivery** Large choice of current types and dimensions mostly ex stock.
- **Attractive prices** No minimum quantity, the total number of all pieces gives you the optimal discount!  
Discount for a total number of connectors per order :  

from 10 St.	10%
from 20 St.	12%
from 50 St.	15%

## The industrial standard types in a glance

We deliver all your needed connectors in the best quality.

		Grid-dimensions of the inserts / number of poles (+ PE)	
		1 contact-insert	2 contact inserts
<b>„Heavy“ connector 27N</b> 16A, 500V (series CN, Han E, C146E) Preferred series, ex stock See pricelist group 26, 27	●	44x27 / 6-pol	
		57x27 / 10-pol	
		77x27 / 16-pol	77x62 / 32-pol
		104x27 / 24-pol	104x62 / 48-pol
<b>„Narrow“ connector 16S</b> 16A, 400V (series CDA, Han A)	●	49x16 / 10-pol	
		66x16 / 16-pol	66x40 / 32-pol
<b>„Cube“ connector 21W</b> 10A, 250V (series CK)	●	21x21 / 3-pol	
		21x21 / 4-pol	
<b>„Compacte“ connector 3R4</b> 10A, 250V (series CD, Han D) (500V possible, if less pins used, see datasheet)	●	49x16 / 15-pol	
		66x16 / 25-pol	66x40 / 50-pol
		77x27 / 40-pol	77x62 / 80-pol
		104x27 / 64-pol	104x62 / 128-pol
<b>„DD“ connector 4R6</b> 10A, 250V (series CDD, Han DD) (400/500V possible, if less pins used, see datasheet)	●	44x27 / 24-pol	
		66x16 / 38-pol	66x40 / 76-pol
		57x27 / 42-pol	
		77x27 / 72-pol	77x62 / 144-pol
		104x27 / 108-pol	104x62 / 216-pol

The design is suitable for heavy duty operation under industrial circumstances. Nevertheless, special conditions may require particular types, f.e. inserts and enclosures for high temperatures or aggressive environments.  
If you have any question about this topic, please let us know !

## Handles for „heavy“ connectors

**Stable, heat-resistant handles made from injection-moulded aluminium for heavy connectors with 2 latches available as an option**

You know the problem: The connectors on the mould have to be changed too often, as they can't stand the heat and heavy operation .

Connectors with handles made from **injection moulded aluminium** are the solution:

- **No injuries on sharp edges of broken metal pieces**
- **Much more stable than conventional handles made from sheet metal**
- **Longer life, thus, less costs**

All enclosures of the "heavy" series (connector and terminals) with 2 latches can be ordered alternatively with these stable handles made from **injection moulded aluminium**.

Order your connectors for new moulds or maintenance with these new, stable handles...

Art.-Nr.

Description

16690

Alu-Handles  
(1 pair)  
for heavy connector  
with 2 latches  
(10-, 16- u. 24-pol).

Make use of our convenient discount scheme (see front page) and order your handles together with other connectors and parts.

Delivery time: Connectors are normally available ex stock or in a few working days.

Prices: Ex-works Alfter-Volmershoven, plus freight and TWA, if applicable

Freight: UPS express saver, depends on destination

Payment: 14 days 2% skonto or 30 days net
